ICT4SILVER

## SUMMARY

I.	Introduction.....	3
II.	Actors distribution in the Sudoe area .....	3
	a) Type of actors in the Sudoe region .....	5
	b) Type of actors in the three Sudoe countries .....	5
III.	Actors details .....	8
	a) France .....	8
	b) Portugal .....	84
	c) Spain .....	349

## I. Introduction

The SUDOE territorial space will have, by 2050, the oldest population of Europe. The ageing of our population represents a challenge for our public policies but also an asset for our companies. Considering the ageing society on one side, and a digital ecosystem rapidly expanding of the other one, how make so that the challenges of one could be the opportunities of the other?

Here is the stake in ICT4SILVER, European project carried by the Agency of Development and in Innovation of the Region Nouvelle-Aquitaine, Tecnalía, GAIA, KIMbcn, Home Care Lab, TICE.PT, IPCA, Autonom' Lab and Cluster TIC SANTÉ. This project has for ambition to support the market launch of digital products or services from SME of our territories, answering the needs of Silver Economy actors.

The Silver Economy expresses itself in various domains: health and medical and social, autonomy and remain at home, housing and urban planning, transport and mobility and prevention, well-ageing and health tourism. It groups start-ups, SME, big companies but also professionals of the academic research, training and the social and health.

To report this diversity, the ICT4SILVER partners listed the leading players of Silver Economy on their territory. You will find in this collection the essential information on every organization. If you wish to know more about it, on their activity, their market, get in touch with the partner associated in order to obtain more information

## II. Actors distribution in the Sudoe area

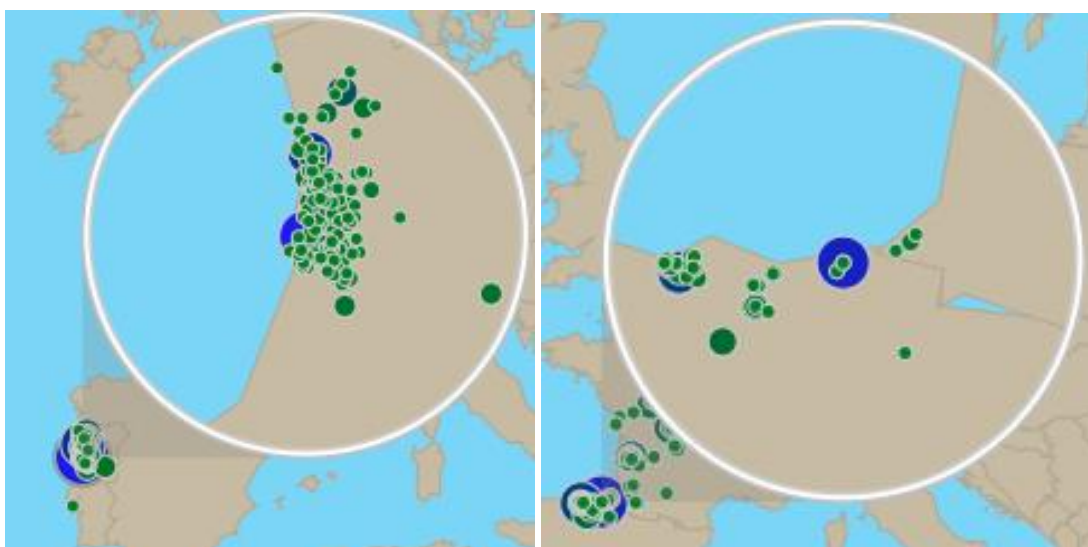

Country	Actors
France	75
Portugal	265
Spain	89
Total Global	429

The following images illustrates the geographic concentration of the SE actors referenced in the project.

Green spots represent less dense areas and blue spots represent denser areas, reaching the maximum of 25 actors.

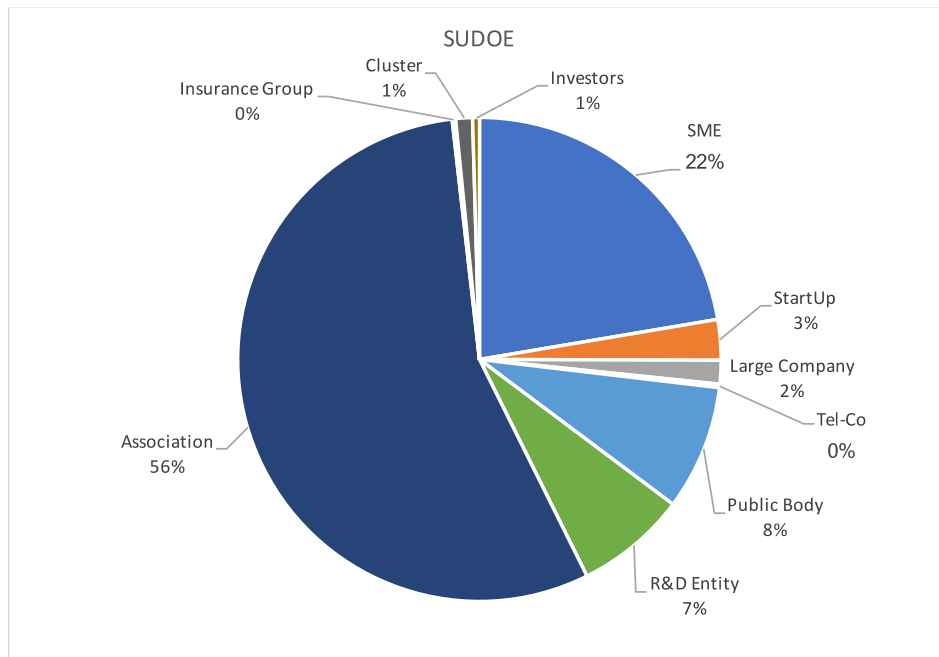

Compared to France's dispersion, the littoral north of Portugal and Basque Country in Spain, both presents the denser areas, in result of the smaller territorial areas and the natural concentration of the population and enterprises.

### a) Type of actors in the SUDOE region

In the following chart, we find that the Associations and SME organizations are the most represented SE actors. This observation is influenced mainly by Portugal data, as we will further demonstrate.

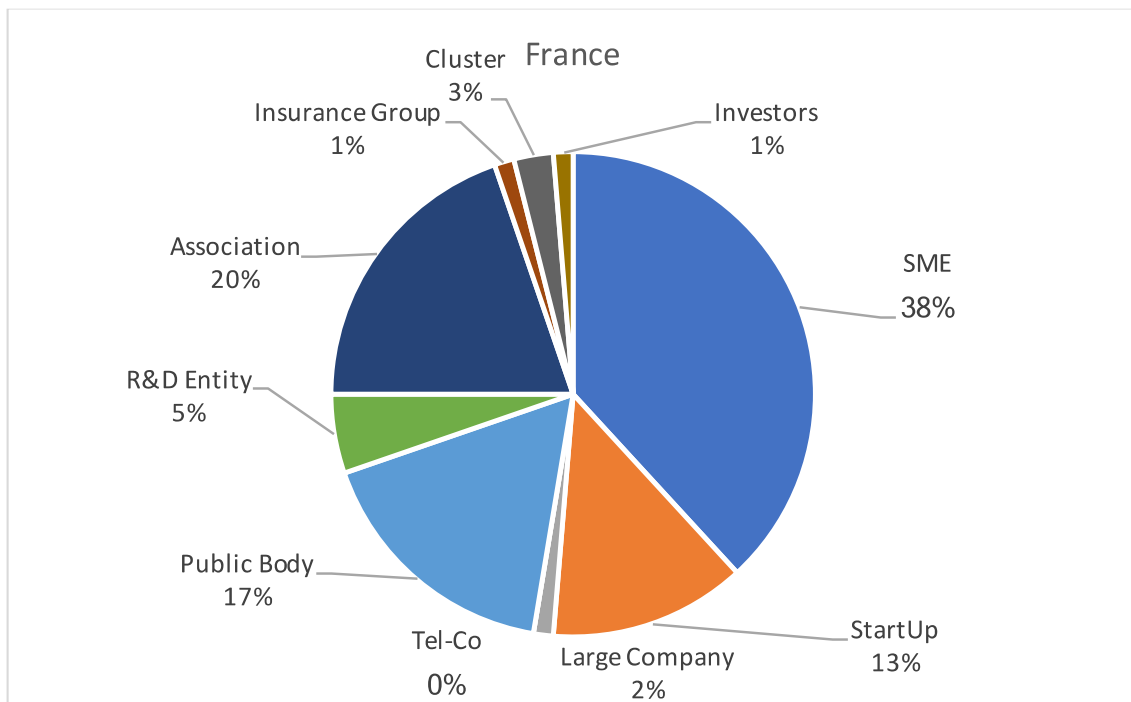

### b) Type of actors in the three SUDOE countries

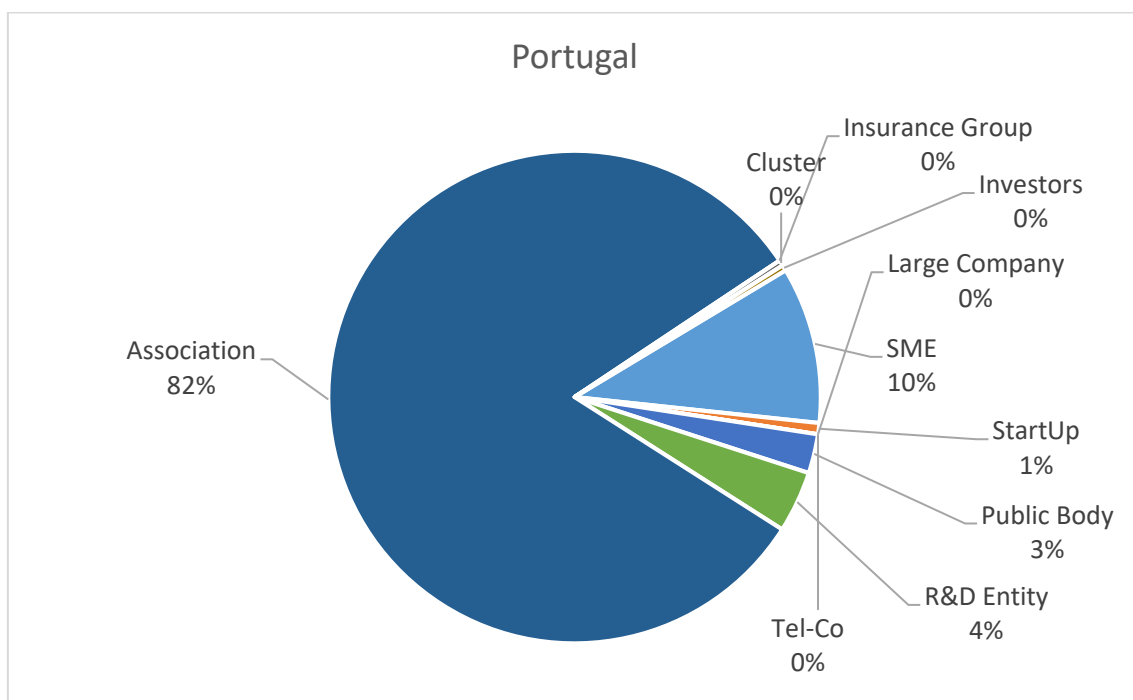

The following table summarizes the number of organizations classified in each actor type by country, showing a heterogeneous distribution between the countries.

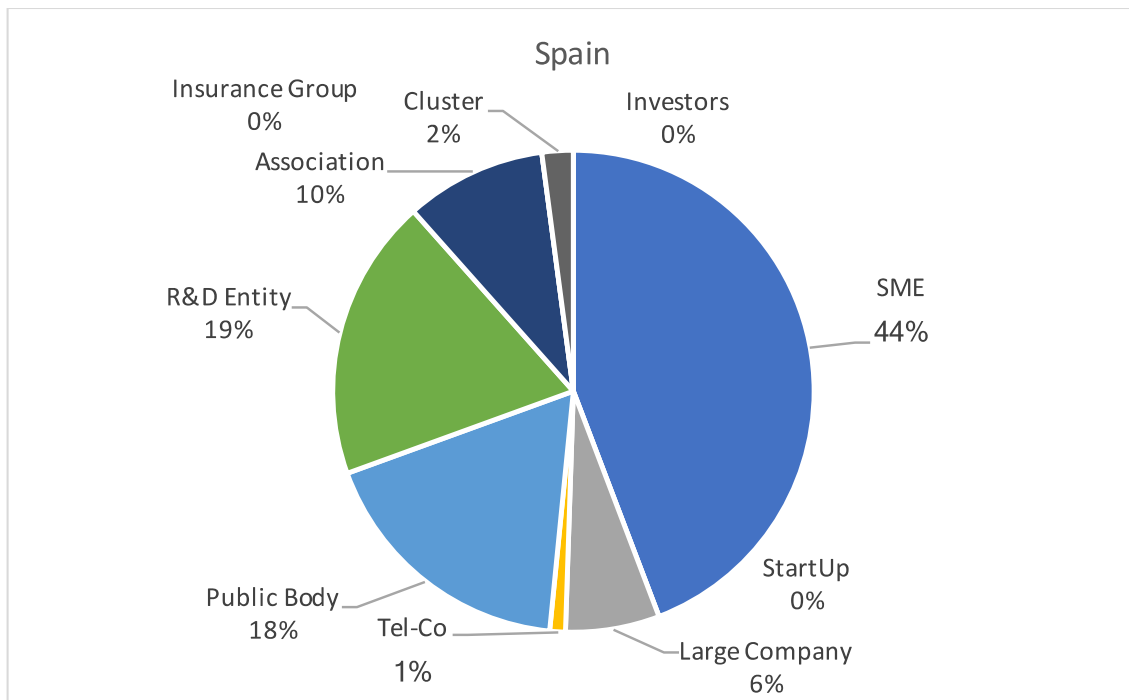

Ator Type by Country	SME	StartUp	Large Company	Tel-Co	Public Body	R&D Entity	Association	Insurance Group	Cluster	Investors
France	29	10	1	0	13	4	15	1	2	1
Portugal	28	2	0	0	7	11	222	0	1	1
Spain	42	0	6	1	17	18	9	0	2	0
SUDOE	99	12	7	1	37	33	246	1	5	2

The Associations and SMEs are the most representative types in Portugal and France, but Spain presents a stronger presence on SME actors.

In Portugal, Associations operating in the SE have an appreciated visibility, reflected in the number of such organizations that were suggested to be considered in the project.

### III. Actors details

#### a) France

VISION, MISSION, AND GOALS			
<p>DomAssist est une plate-forme d'assistance domiciliaire développée par l'équipe Projet Phoenix à l'Inria. Cette plate-forme repose sur un store d'applications se fondant sur un ensemble de base d'entités (capteurs, actionneurs et services Web). Cette plate-forme est expérimentée dans le cadre d'un projet visant à en démontrer son intérêt pour le maintien à domicile des personnes âgées. Dès le début de la conception de cette plateforme, des informaticiens et des chercheurs en psychologie du vieillissement et en ergothérapie ont travaillé en étroite collaboration pour élaborer des services d'assistance répondant aux besoins variables et évolutifs des utilisateurs finaux. Les résultats préliminaires de cette étude montrent que la plate-forme est bien adoptée (très acceptée, facile d'apprentissage, et utilisable) par les personnes âgées et leurs familles ou aidants mais surtout elle confère une plus grande auto-détermination de la personne âgée (meilleure autonomie, meilleur contrôle de l'environnement, meilleure autorégulation). Les retombées attendues sont : 1) une prolongation du maintien à domicile ; é une amélioration du bien-être et de la santé de la personne ; et 3) un appui aux missions des aidants formels et une amélioration du bien-être de l'aidant naturel.</p>			
COMPETENCES			
<p>DomAssist a été conçu selon une approche pluridisciplinaire. L'équipe Phoenix qui a conçu et développé DomAssist est notamment composée de chercheurs et ingénieurs experts en informatique, psycho-gérontologie, sciences cognitives, ergonomie et facteurs humains. Les solutions technologiques de DomAssist s'appuient sur la plateforme DiaSuiteBox qui permet l'orchestration d'objets communicants. Cette plateforme, développée par l'équipe Phoenix chez Inria, est basée sur une suite d'outils appelée DiaSuite qui couvre tout le cycle de développement des applications d'orchestration : de la conception jusqu'à la publication sur un catalogue en ligne avec certification. DiaSuite et DiaSuiteBox représentent 7 années de recherche et 9 thèses de doctorat.</p>			

SOLUTIONS/PRODUCTS ALREADY ON THE MARKET
<p>La solution DomAssist est tout à fait novatrice sur le marché transverse de la Silver Economie pour les raisons suivantes :</p> <p>DomAssist propose un catalogue d'applications conçu par des spécialistes du vieillissement, des spécialistes en ergonomie et facteurs humains, des chercheurs et ingénieurs experts en informatique. Ce catalogue couvre trois volets considérés par les psychogérontologues comme essentiels pour le maintien à domicile : la sécurité de la personne au domicile, les activités du quotidien et le lien social.</p> <p>DomAssist délivre des services d'assistances contextualisées grâce à une orchestration des objets communicants dirigée par des analyses ergonomiques des activités domiciliaires. Par exemple, une invitation à la préparation d'un repas sera suggérée à l'utilisateur si aucune activité de cuisine n'est détectée parmi celles réalisées dans la journée</p> <p>DomAssist fournit des services d'assistances personnalisés et évolutifs par une offre d'applications multiples pour une même activité couvrant ainsi la variabilité des besoins selon les personnes et les âges de la vieillesse. Ainsi, une application de rappel de prise de repas peut prendre la forme d'une invitation à la préparation de repas ou se transformer en une application de guidance à la préparation d'une recette de cuisine, parmi un répertoire de recettes préalablement, choisie par l'utilisateur ou son aidant.</p> <p>DomAssist offre une solution qui permet d'intégrer des briques matérielles et logicielles d'assistance à la personne. Ainsi, un pilulier connecté peut faire levier sur des objets comme la TV ou une tablette pour rappeler la prise de médicament et contacter le pharmacien pour un renouvellement d'une ordonnance.</p> <p>DomAssist permet de mutualiser les entités matérielles et logicielles du domicile. Par exemple, le détecteur de mouvements peut être utilisé pour monitorer l'activité de la personne, pour assurer la protection du domicile et participer à un chemin lumineux.</p> <p>DomAssist est interfacé avec des technologies à coût réduit, ou gratuites dans le cas des services Web, comme Google Calendar.</p> <p>DomAssist requiert une maintenance minimale car la solution est basée sur une architecture de type Cloud et des briques technologiques robustes, diffusées à très large échelle.</p> <p>DomAssist bénéficie d'une validation scientifique de son efficacité auprès d'un panel représentatif d'utilisateurs et d'un groupe contrôle.</p>
PREVIOUS PROJECTS IN THE SE FIELD
<p>Le projet DomAssist est accompagné du lancement d'une startup qui prendra le relais de l'équipe de recherche Phoenix pour le recrutement de participants impliquant des acteurs privés, comme des résidences services.</p>

VISION, MISSION, AND GOALS			
<p>Depuis 1998, PAVE opère au croisement disciplinaire entre sociologie, anthropologie et architecture pour investir la connaissance des formes matérielles des sociétés. L'entrée plus sociétale des sociologues et celle, plus formelle des architectes sont mises en travail pour une lecture critique et l'analyse des formes d'organisation des territoires déclinées à plusieurs échelles, micro (le domestique, l'espace public) ou macro (la ville, la métropole et la mondialisation urbaine). Le concept d'échelle est ainsi ajusté aux uns et aux autres comme la mobilisation des théories propres à chaque discipline sert une démarche d'ensemble qui vise à caractériser et expliquer la fabrication des espaces et des territoires contemporains. Ses méthodes privilégient l'analyse des projets architecturaux et urbains, de groupes professionnels, et de dispositifs de production. Ses travaux s'appuient sur des contrats de recherche, sur la formation de doctorants et sur une participation aux activités de formation de l'EnsapBx et de ses partenaires.</p> <p>Le premier objectif de PAVE est de fonder scientifiquement la connaissance des objets architecturés en prenant la distance nécessaire vis-à-vis de la pratique de projet, à caractère architectural ou urbain, dominante dans le milieu de l'architecture. Une posture épistémologique qui n'exclue pas de varier les formes d'investigations et d'intégrer des spécificités des savoirs projectuels. Un second objectif est d'amplifier un positionnement original dans le champ scientifique des sciences humaines en élargissant les croisements disciplinaires potentiels avec la science politique et la sociologie comparatives. Son association avec le CED et une formation en grande partie commune pour les doctorants, y contribuent.</p>			
COMPETENCES			
<p>Habité/Habitat : Objets et modes de vie : Nous poursuivons les réflexions engagées depuis de nombreuses années sur l'habitat vu sous l'angle des acteurs, de la conception jusqu'à la réception. Cette manière d'aborder la thématique de l'habiter contemporain prend en compte des variations contextuelles, politique, sociale ou réglementaire de la production architecturale.</p>

Vision, mission, and goals			
<p>"Mission</p> <p>The Clinic Academic Center – Braga, Association (2CA-Braga), is a non-profit partnership, between the University of Minho (UM), through the School of Medicine (EM) and the Life and Health Sciences Research Institute (ICVS), the José de Mello Saúde Group, represented by Hospitals of Braga and CUF-Porto, and Eurotrials – Scientific Consultants.</p> <p>The 2CA-BRAGA is in a unique and privileged position to ally research with clinical aspects, maximizing the development of innovative biomaterials, diagnostic strategies, regenerative approaches and therapeutic products.</p> <p>With basis on this health ecosystem infrastructure the 2CA-BRAGA, thus, seeks to strengthen University of Minho's position as a leader in bioscience innovation and translational research, promoting in unison with the Hospital de Braga the maintenance of health during the lifespan and, most importantly, contributing to add quality to life through innovative breakthroughs.</p> <p>Vision</p> <p>The 2CA-BRAGA vision is to create a paradigm shift for healthcare: a larger number of subjects can be appropriately monitored and healthcare providers can proactively engage their population into an adjustable healthcare mode.</p> <p>Strengthening this vision, the 2CA-BRAGA seeks to ensure that medical research breakthroughs lead to direct clinical benefits for patients.</p> <p>For this, the 2CA-BRAGA will promote projects in clinical, translational research and clinical trials, will host activities of scientific character in the area of health sciences and provide services for the clinical and scientific community.</p>			

Feeding back into its supporting communities the 2CA-BRAGA will actively engage in a culture of dissemination of the generated knowledge among the scientific community, health professionals and the general public."

Vision, mission, and goals		
<p>The Social Action is one of the five priority areas for intervention of the Municipality of Ílhavo in the 2013-2017 term. In spite of the great attention and investment that has been made in recent years, the multidimensionality of the poverty phenomenon and social exclusion, which give rise to situations of inequality, make it fundamental to continue the intervention in the context of Social Action and Health in an increasingly More integrated and integrated, in the sense of progressive social insertion and an effective improvement of the living conditions of people and families in need, the ultimate objective of our activity.</p>

Vision, mission, and goals			
<p>Missão e Visão:</p> <p>O CHBV assume, como “Missão”, prestar, em tempo útil e com um elevado nível de qualidade, efectividade, eficiência e custos socialmente comportáveis, cuidados de saúde diferenciados, articulando-se com outros Serviços de Saúde e Sociais da Comunidade que serve, bem como com a Rede de Cuidados de Saúde Primários e com a Rede Nacional de Cuidados Continuados Integrados, apostando na motivação e satisfação dos seus Profissionais e Colaboradores. A atividade do CHBV assegura, a cada Utente, os cuidados de que, efetivamente, carece de acordo com as melhores práticas médicas e numa lógica de governação clínica, promovendo, simultaneamente, uma eficiente utilização dos recursos disponíveis.</p> <p>Faz, igualmente, parte da “Missão” do CHBV o desenvolvimento da “Função Formação” que for considerada necessária e adequada à actualização e monitorização de competências dos Colaboradores deste Centro Hospitalar numa tentativa e esforço de acompanhamento da dinâmica, também imparável, do conhecimento.</p> <p>Para atingir tais desideratos elege como seus parceiros privilegiados o ACES do Baixo Vouga e a Universidade de Aveiro.</p> <p>O CHBV pretende ser reconhecido, na Comunidade que serve, pela excelência clínica, eficácia e eficiência, assumindo-se como um Centro Hospitalar de referência; alcançar um forte compromisso com a investigação, a inovação e o desenvolvimento tecnológico e terapêutico e; constitui-se, igualmente, numa referência ao nível da formação pré-graduada e contínua.</p>

Vision, mission, and goals		
<p>The UA's mission is to create knowledge and expand access to knowledge through research, education and cooperation for the benefit of people and society; to undertake the project of global development of the individual; to be active in the construction of a European research and education community; and to promote a model of regional development based on innovation and scientific and technological knowledge.</p>		
Competencies: proprietary technology and/or specialized skills		
<p><b>Research Profile</b></p> <p>Excellence in research is one of the hallmarks of the University: 15 of its 18 research units were classified as Very good or Excellent by international panels under the sponsorship of the Portuguese National Science Foundation in its most recent round of assessments. Four of these units carry the label of Associate Laboratory, a distinction attributed by the Portuguese Government to research institutions of sustained and exceptional merit.</p> <p>Research at the UA promotes innovative products and solutions, contributing to the advance of science and technology. It is a privileged partner for companies and other national and international organisations with which it cooperates on numerous projects and for which it provides important services.</p> <p>During 2010, UA was active in 369 research and technology transfer projects, of which 32 were financed by international and European programmes, mainly FP6 and FP7. These projects were developed in different scientific areas: cellular biology; ceramics and composite materials; design; education and behavioural sciences; electronics and telematics engineering; environmental and marine sciences; geo-technologies and geo-engineering; governance, competitiveness and public policy; languages and cultures; technologies and science of communication; mathematics and applications; mechanical technology and automation; music and dance; nanostructures, nanomodelling and nanomanufacture; organic chemistry and telecommunications.</p>

Vision, mission, and goals		
Intellicare provides health and well-being remote monitoring solutions. Thus, we intend to: Improve quality of life Support active ageing Promote health education  To achieve our goal, we recognise the importance of measurement devices, information and communication technologies as the heart of our business activity.		
Competencies: proprietary technology and/or specialized skills		
SE Solutions/Services/Products already on the market (4 most relevant, if there are more)		
- OneCare Sensing - With OneCare Sensing you can monitor these and other indicators comfortably at your home. The evaluation of these factors is autonomously and simply executed. It also allows your doctor to access this information in real-time and there is a data history permanently available. - OneCare Safe - OneCare Safe allows you to request aid by an alert/voice call to a family/caretaker. When a fall occurs an automatic call is made to the preconfigured family/caretaker and, if necessary, information about the device's GPS location is given. - OneCare Dori - OneCare Dori allows you to set reminders of your medication by a voice call. You get an interactive phone call reminding you to take your medication and, simultaneously, your family/caretaker receives a note about the result of the phone call, to act accordingly. - Vivago Residencial - Vivago Residencial provides permanent monitoring of your activity levels, well-being, among others, at your home. In addition to triggering manual alarms, automatic, intelligent and personalised alerts are sent out to your family or caretakers. It also can be used for home care services or to clinically monitor users after hospitalisation ends.		

Previous projects in SE field (4 most relevant, if there are more)
<p>- AAL4ALL - This project aimed bringing together the main stakeholders (public organisations, industry, user organisations and I&amp;D institutions) to decide a set of Ambient Assisted Living services.</p> <p>- Giraff Plus - Giraff Plus project developed a robot to keep elderly people comfortably at their home, using a set of sensors to monitors health parameters, ambient variable and fall detection. Giraff robot allows the integration of custom sensors according to the users' needs. The device has a visual interface including Skype functionalities which allows caregivers and family members to visit virtually the person at home.</p> <p>- Sounds4Health - This project aimed to developed a mobile system able to analyse breathing sounds that monitor breathing cycles. Besides this, the system can also record the sounds, as well as other biomedical and mental parameters, transmit them to a central health unit where they become available for a health professional to analyse them.</p> <p>- WiCardioResp - This project main goal was to develop an integrated system to monitor physiological parameters and remotely control mechanical ventilation. It had to work at patients' home allowing healthcare providers and healthcare professionals to have access to continuous monitored parameters, as well as the ability to adjust operating parameters of an assisted ventilation machine remotely, thereby reducing visits to health facilities and enabling closer monitoring.</p>

Vision, mission, and goals		
ActiveThings is a technology based company, that was born to address the market with conception and development of smart systems. Young and dynamic, ActiveThings is guided by values such as Professionalism, Attitude, Knowledge, Creativity, Innovation, Excellence and Commitment! We want to contribute with competitiveness, innovation and technology		
Competencies: proprietary technology and/or specialized skills		
- The OCPP - Open Charge Point Protocol (initiative of the E-Laad foundation) is an application protocol for communication between EV charging stations and a central management system. Based on version OCPP 1.5, ActiveThings developed a centralized OCPP management solution, using maximum performance technologies such C++ and SOAP webservices; - With an experienced team in portals deployment, ActiveThings developed a platform based on opensource technologies that facilitate and accelerate the delivery of solutions, regardless of the local housing or cloud regime needed.		
SE Solutions/Services/Products already on the market (4 most relevant, if there are more)		
- In Development: Social project (funding P2020, in co-promotion) - KHIS Light An innovative solution designed to support the clinical practice and the management of practitioner's offices and small health units. Accessible, securely, from any device with a web browser, anytime and anywhere. Provides the health professionals an easy and intuitive tool to log clinical data, prescribe and monitor the evolution of their patients.

Vision, mission, and goals		
<p>The social objective of inithealth is the design, development and commercialisation of applications and technical solutions specific to the areas of health, wellbeing and sport. At inithealth, init Group's health department, we promote the development and use of innovative digital tools that allow many people to personally manage their health and to adopt healthy habits. Init Group's mission is to link society's challenges to entrepreneurs and business-minded organisations who want to search for ideas and solutions to those challenges, using all tangible, or intangible, resources that make it possible to carry this out. Throughout this, great innovative ability and the latest advances in technology are applied.</p>

## HEALTH

- An Integral Hospital information System, whose scope includes all the functionalities necessary for the operation of a hospital, admitting multi-hospital corporate environments. As well as the more conventional modules (G. Patients, Notifications, G. Surgery, Uni-dose, Filing and Documentation, Invoicing), it includes others of high value, such as the Advanced Electronic Prescription.
- An Integral Environment for the clinic professional (Indigo). As a result of the wide experience in the implantation of clinical stations and the collaboration of doctors and nurses, a system has been designed which goes beyond that existing on the market until now. Doctors have a tool perfectly adapted to their needs, allowing them to approach the patient with 360º vision.
- Clinical Security in the Surgical Block (KIRUS). A comprehensive solution for the surgical process, focused on guaranteeing clinical security by incorporating advanced technologies such as identification by radio frequency, voice recognition and the monitoring of surgical protocols in the operating room in real time.
- Other innovative solutions:
  - Automatic codification of diagnoses (KODIFIKA). The doctor registers the diagnostic impression in natural language and the system translates it directly into codes CIE9 and CIE10.
  - Obstetric process. Complete monitoring of the pregnancy process (pregnancy handbook) and the birth. Security by RFID for mother and baby.
  - Decision-making applying Medicine based on evidence.
  - Complex analysis of large volumes of information, including semantic techniques.

- Faculty of Business Studies
- Faculty of Humanities and Education

#### Previous projects in SE field (4 most relevant, if there are more)

MONNDRAGON UNIVERSITY understands that integrating its three main activities –namely, teaching, research, and transfer– is the most effective way of increasing quality and fulfilling its social mission.

- Collaborative research model:

The collaborative research model is based on research alignment, from oriented basic research to innovation, with the participation of three key actors: Universities, technology centres, and businesses through R&D departments.

AREA	LINE OF RESEARCH
TECHNOLOGY	Mechanical Behaviour and Product Desing
	Science, Technology and Transformation Processes
	Embedded Systems and Information Systems
	Electrical Energy
	Design and Industrial Organisation Processes

<p>TEST ABOUT THE CONCEPT HOME CARE CENTER: ondragon Health is a strategic unit of the Mondragon Corporation who leads the development of new businesses and activities around the health sector in the group. It joined H-Enea Living Lab to be able to understand better the response of potential users to a new concept. Mondragon Health needed to fully understand the</p>			

perception that their future customers had about an innovative concept, before placing it on the market, in order to adapt it to their demands first.

INVESTIGATION IN THE SOCIO-SANITARY SECTOR : Our client, the Basque Cluster Association of the Home Appliance Industry (ACEDE) needed to generate new business ideas to develop new products and services related to health, welfare and accessibility services. Both for companies that comprise it, and for other companies and SMEs belonging to the field of the household. The goal was to identify what trends were emerging in this sector and what future business opportunities are opened to the new demands of the users who are changing so fast.

<p>Unit dedicated to the generation of applicable knowledge and its dissemination in society (I+D+i). It is, therefore, the vehicle through which Matia Fundazioa realises its strategic objective of generating applicable knowledge and promoting its transfer, specialising in and promoting the application of its own knowledge. A distinguishing feature that sets the differential value of Matia Fundazioa apart from other specialised institutions in the field of ageing.</p> <p>The activity of the Matia Gerontological Institute is based on the generation of knowledge and gerontological innovation and its transfer from a psychosocial approach.</p> <p>From the Matia Gerontological Institute and together with Matia Fundazioa, we work on innovative projects to promote autonomy in everyday life and the dignity of the elderly, with the ultimate aim of attaining their well-being.</p> <p>The Matia Gerontological Institute pursues the generation of interdisciplinary scientific knowledge to maximise personal autonomy, independence, health and quality of life of the elderly and disabled, as well as that of their caregivers.</p>

Vision, mission, and goals		
<p>The Basque Culinary Center is a pioneering academic institution worldwide, created by seven of the top Basque chefs along with Mondragon University, and with the involvement of eleven of the most influential chefs in the world.</p> <p>At the Basque Culinary Center our main aim is higher education, research, innovation and promotion of gastronomy and nutrition.</p> <p>Since its creation, in September 2011, we have worked to become the international benchmark in this field and also to promote gastronomy as a lever of social-economic development through the Faculty of Gastronomic Sciences and the Centre for Research and Innovation. We also develop many different promotional activities.</p>

Vision, mission, and goals			
<p>Mission:</p> <p>San Sebastian City Council, through Compañía del Tranvía de San Sebastián, provides the public transport service to travellers in the city. With our continuous efforts to be leaders and offer a competitive service we aim at satisfying the mobility needs of current and potential users, with a top quality service and practical information, with competitive costs and contributing to the sustainability of our environment.</p> <p>Future vision:</p> <p>Compañía del Tranvía de San Sebastián aims at being leader in mobility in our city, in relation to the services offered and their quality.</p> <p>We will be deploying a variety of measure with an aim to improving the image society has of our company and in order to ensure it is socially active and responsible as well as promote the development of the city, the environment, customers and employees alike, and the rest of the actors involved.</p> <p>The Company's values are the pillars guiding all Dbus employees.</p> <p>Customer-orientation and improved services</p> <ul style="list-style-type: none"> <li>• Policies for improved customer service and campaigns to encourage the use of the bus.</li> <li>• Continuous improvement of our services, as regards the number of routes offered, journey times, punctuality and regularity, safety and comfort.</li> </ul> <p>Personnel</p> <ul style="list-style-type: none"> <li>• The Company works to ensure compliance with the strictest criteria on equality of opportunity and transparency.</li> <li>• We guarantee the same rights and opportunities for men and women within the company.</li> </ul> <p>The environment</p> <ul style="list-style-type: none"> <li>• We strive to ensure compliance with all prevailing standards and laws concerning the environment and we aim to do no more by taking a proactive attitude.</li> <li>• We advocate sustainable development with is respectful of the environment with the installation and use of the latest technological advances in our buses.</li> </ul>			

Quality	
<ul style="list-style-type: none"> <li>• Continuous improvement aimed at adopting preventive measures rather than corrective ones.</li> <li>• Orientation towards the creation, as well as perception by users, of greater satisfaction, while always offering competitive fares</li> <li>• Achieving excellence in the services offered.</li> </ul>	
<p>The objectives set by Dbus can be divided into three groups:</p> <p>Promoting public transport, its efficiency, and its integration in other forms of mobility.</p> <p>Improving the service to residents so that using Public Transport appeals more to them than using their own cars.</p> <p>Improving the company's internal management in order to make more efficient use of the available resources and increase the degree of engagement, commitment and satisfaction of the company's staff.</p>

<p>SPECIALISTS IN HEALTH AND WELLBEING</p> <p>Fagor Healthcare offers the most innovative services in health and wellness. We specialize in people and every day we work to create the most efficient products in order to improve your quality of life. Whether you are a health professional or a patient in Fagor Healthcare we take care of you.</p> <p>THINKING IN POSITIVE: R&amp;D</p> <p>Fagor Healthcare has a strong R&amp;D department that allows us to investigate with new approaches and solutions to improve the existing products or develop new ones. Before bringing to life a new product and market it, we “recreate it” searching for an efficient and sustainable design. The feasibility of the product is exhaustively checked through pilot tests in micro-markets. Everything can be improved researching and approaching to the needs of the user.</p> <p>PART OF A WHOLE</p> <p>Fagor Healthcare is a cooperative born in the bosom of MONDRAGON Corporation. Innovation, generation of new jobs and the cooperative principals are part of our DNA, without forgetting that we are a company with international presence since the very beginning. Health is a strategic field, as much for our company as it is for MONDRAGON. Fagor Healthcare counts with the invaluable support of a worldwide consolidated group MONDRAGON.</p>
